

Just use User guide Document series with another role Like When you were developer

In 1. Create personal line account of “Create Line Business Account” Document.

Download app for pc: <https://line.me/en-US/download>

Then do everything untill you reach

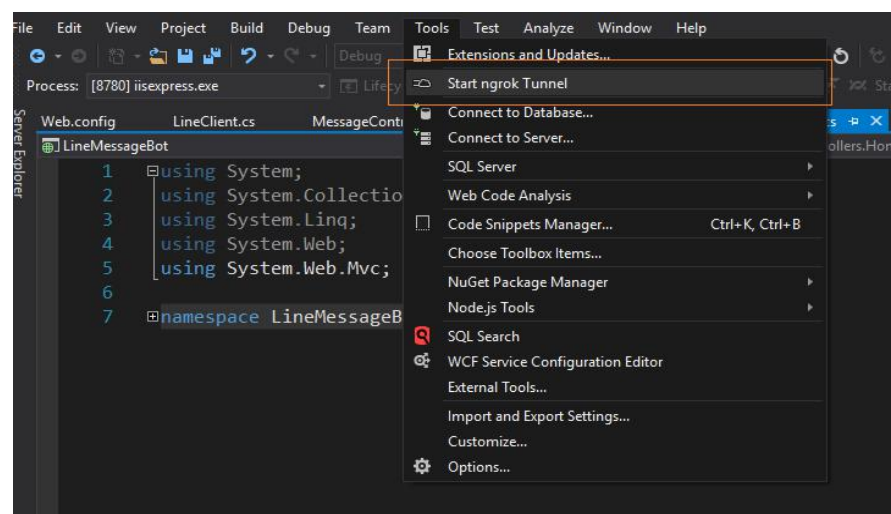

2.3 Config the channel if you need debugging

You have to download and set up ngrok into visual before set up in Line (Just For Dev)

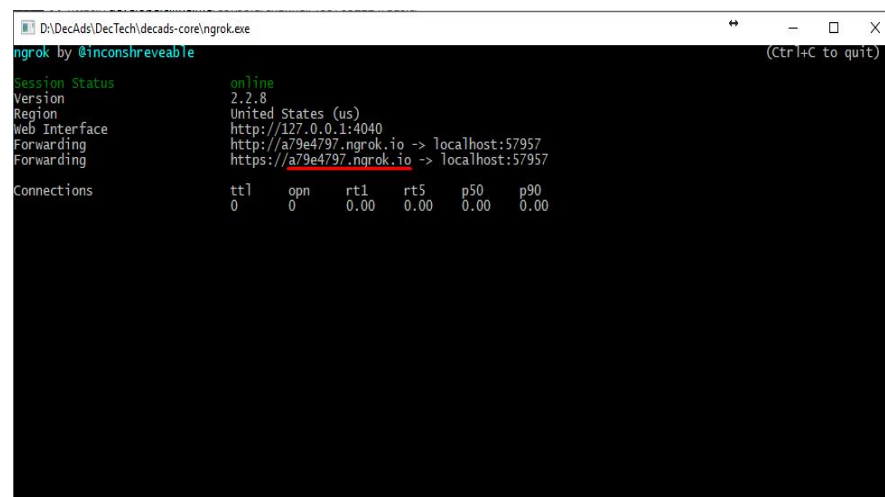

Link download:

<https://marketplace.visualstudio.com/items?itemName=DavidProthero.NgrokExtensions>

After seted up ngrok into visual. It will appear in visual

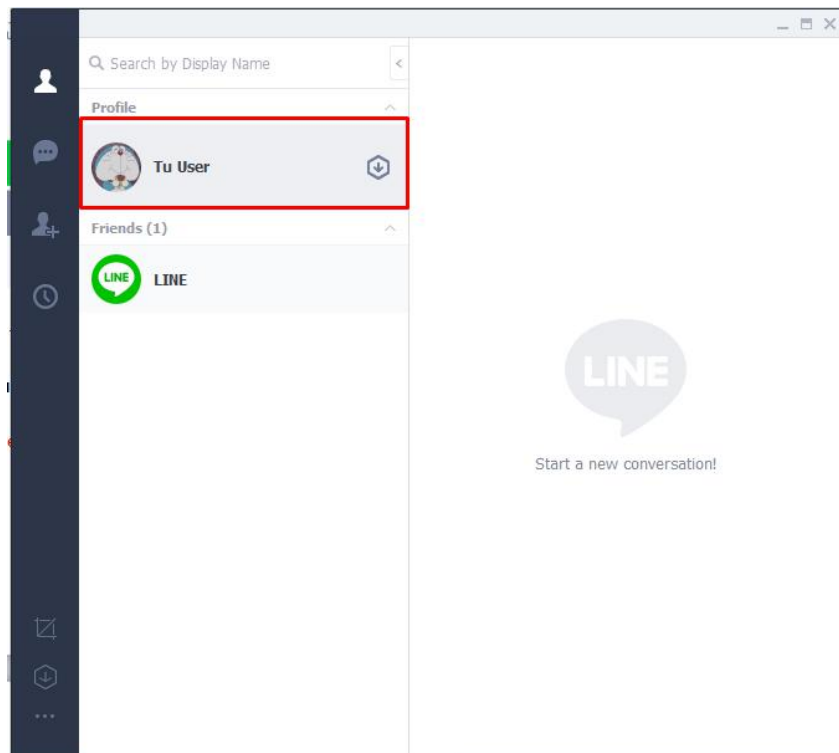

Start ngrok and appear console and copy the line that I underline in the picture below.

Then leave it alone and go back to “Channel settings” page and continue

* If you use app for pc to sign up it will be able to automatic login for you

Verify your bot,when you finish everything in **“Create Line Business Account”** Document.
